

CompAM Fund Sicav

Active Liquid Strategy

31 March 2025

Fund Overview

Active Liquid Strategy is an effective solution for investors who want to achieve high returns with low correlation to financial markets and tolerance to a certain degree volatility.

A mix of top down macro fundamental analysis, in depth fundamental value analysis and a great attention to markets' trends are the base of our investment style to achieve fund's return.

Compass Asset Management has over 15 years of experience investing in International financial markets.

Investment Strategy

We are active investors. Our strategy is Global macro discretionary top down with a technical overlay. Our top down global macro approach is based on exploiting "next" market trends (up or down) through an analysis to global and local economic trends and a focus on market timing in order to minimize draw downs.

We mitigate risks investing only in very liquid instruments, through hedged trades and a very nimble approach to always changing markets.
